

Lockout Tagout Field Technician

Martin Technical is a leader of industrial safety and engineering services & training for plants and facilities in the United States and international markets. Personally and professionally, we hold ourselves to the highest standards in the industry, and are known for problem solving, innovation and customer service. Based in Arvada, CO and with team members across the US and Europe, we promote a forward thinking culture and put our employees first.

We are looking for a Lockout Tagout (LOTO) Field Technician to join our professional services team. The position requires visiting plants and facilities to identify all energy sources for machines and equipment in order to develop step-by-step procedures for safe shut-down of equipment. With experience, Lead Technicians also provide training, consulting and evaluation services to our customers. LOTO Technicians travel frequently to different plants and facilities throughout the US, and interface with maintenance managers, health and safety managers and other high level positions.

Responsibilities

The job includes, but is not limited to:

- Working in a team environment to provide the best lockout services in the industry.
- Identifying machines and equipment subject to LOTO procedures. Identifying all energy sources for the equipment. Collecting data on the equipment into the Martin Technical Rapid LOTO app on the iPad.
- Interfacing with customer maintenance, health and safety and operators personnel to gather information about their equipment.
- Developing written procedures using our Rapid LOTO app and software system. Reviewing the procedures for accuracy and quality. Printing out, laminating and organizing procedures for the customer.
- Providing training and consultation on LOTO for our customers, including how to use our Rapid LOTO app and online software program.
- As training, experience and demonstrated abilities advance, additional responsibilities and work may be available.

Job Requirements

- Ability and desire to work in industrial and commercial environments around machinery.
- Ability and desire to travel on average 2 weeks per month.
- Be in good physical shape and capable of walking all day at a plant.
- Mechanical and Electrical industrial systems and knowledge / aptitude. Those with maintenance, equipment installation or troubleshooting or repair backgrounds with good technical understanding are preferred.

- Proficient with computers , Windows operating systems and tablets.
- Good typing skills.
- Analytical thinking and skills required.
- Good communication and writing skills to develop LOTO procedures and communicate with our customers and staff. Must be comfortable in asking directions and speaking in front of small groups for training.
- Willingness and aptitude to learn from our current staff, and to be a team player
- Bonus skills include previous lockout writing experience or similar safety writing experience such as job hazard analysis or confined space.

Job Locations & Time

Lockout Field Technicians work at customer plants and facilities in order to collect data, which requires frequent travel to a variety of plants across the United States. Job times can vary and are dependent on the customer's operations. Typical work days start at 7 am and end at 5 pm, although longer days are sometimes required depending on the job.

Work typically includes 2 weeks per months in the field with teams of 2 to 5 people.

Compensation

- Contract, Part Time and Full Time positions are available. Compensation is dependent on experience and chosen position.
- Full time employees are eligible for 401K plan, disability insurance and other benefits.
